Non−homologous end−joining
Cell cycle
Neomycin, kanamycin and gentamicin biosynthesis
Cysteine and methionine metabolism
Tight junction
Fatty acid elongation
Fatty acid metabolism
Cell adhesion molecules (CAMs)
Peroxisome
Metabolic pathways
NOD−like receptor signaling pathway
Ribosome biogenesis in eukaryotes
Oxidative phosphorylation
Tyrosine metabolism
Glyoxylate and dicarboxylate metabolism
Lysosome
Focal adhesion
D−Glutamine and D−glutamate metabolism
Cytosolic DNA−sensing pathway
Aminoacyl−tRNA biosynthesis
Toll−like receptor signaling pathway
Apelin signaling pathway
Ribosome
Intestinal immune network for IgA production
